

Bellevue/Issaquah TROUT UNLIMITED

Presents

Adopt-A-Fish

Since October 2006, the Bellevue/Issaquah Chapter of Trout Unlimited in cooperation with Save Lake Sammamish, the City of Issaquah, local Boy Scout Troop 366, the Issaquah High Roots and Shoots Club, the King Co. Department of Natural Resources, the Wild Fish Conservancy, the Washington Department of Fish & Wildlife and the U.S. Fish and Wildlife Service has been working to protect and restore the Lake Sammamish kokanee. These projects include habitat restoration, trapping and counting out migrating fry, placing acoustical tags on native Kokanee, Cutthroat Trout, Small Mouth Bass and Northern Pike Minnow and tracking their movement throughout the Lake Sammamish watershed through the placement of listening stations throughout the lake and its tributaries, and educational signage and literature. The data we collect, the habitat we restore, and the raising of public awareness is vital if we are to save our kokanee.

Lake Sammamish Kokanee #1 4/17/2009

Lake Sammamish Cutthroat Trout #1 4/17/2009

In order to continue all of this great work we need your help. Please support our volunteer efforts by adopting a fish. With a \$100 donation we will send you a picture 8" X 11" of one of the fish we catch and tag. Along with this photo you will receive its vital statistics, where it was caught and information regarding its life history. You will also receive a periodic record of its movement as we track them around the lake.

A \$300 donation will allow you to accompany our research crew on a trip to help collect and tag the fish you are adopting!

We gladly accept and appreciate any other donations you are able to give.

Thanks for your support in helping us save our little red fish!
